SUMMARY

Senior Front-End Engineer with 12+ years of experience building high-performance web applications, developer tools, AI products, SaaS applications, and Web3 platforms. Specialized in React, TypeScript, Next.js, and modern front-end architecture, with extensive experience designing and shipping full-stack products from concept to production. Strong background in open source, blockchain applications, developer tooling, and real-time systems.

EXPERIENCE

Dashfy - Remote

Jan 2026 – Present

Founder & Full-Stack Engineer

- Founded and independently developed an open-source, real-time dashboard framework for developers and engineering teams.
- Designed and built a plugin-based architecture, enabling developers to extend the platform with custom widgets and integrations.
- Implemented a WebSocket-based communication layer for live dashboards and event-driven updates.
- Built a reusable component library to accelerate development and ensure a consistent user experience.
- Developed reusable extensions that enable developers to build custom dashboards.
- Architected the project as a scalable pnpm monorepo with Turbo, focusing on maintainability, extensibility, and developer experience.

Tech stack: React, TypeScript, Tailwind CSS, shadcn/ui, Socket.IO, Node.js, Turbo, pnpm, GitHub API.

PHOOTO.AI - Remote

Nov 2024 – Jun 2025

Founder & Full-Stack Engineer

- Founded and independently developed an AI-powered platform that transforms regular photos into professional-quality headshots.
- Designed and built the entire product from scratch, including the frontend, backend, authentication, payments, and deployment.
- Integrated AI image generation APIs to deliver professional, studio-quality headshots within minutes.
- Built a responsive marketing website and onboarding flow focused on user acquisition and conversion.
- Owned the complete product lifecycle, from UX design and payment integration to deployment and production support.
- Generated over 1,000 headshots during the initial launch period, validating user demand and platform reliability.

Tech stack: React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, React Email, Resend, Stripe, Supabase, Astria FLUX API.

defi.money - Remote

May 2024 – Nov 2024

Senior Front-End Engineer

- Built the frontend for a cross-chain, over-collateralized stablecoin protocol based on an authorized fork of crvUSD.
- Contributed to the development of a unified multi-chain user experience, allowing users to manage positions across multiple EVM networks from a single interface.
- Assisted in developing cross-chain functionality using LayerZero OFT, enabling seamless asset transfers between supported networks.
- Collaborated with smart contract engineers to translate protocol specifications into production-ready user interfaces.

Tech stack: React, Next.js, TypeScript, Tailwind CSS, Zustand, React Query, Viem/Wagmi, LayerZero OFT.

LlamaFolio - Remote

Jul 2022 – May 2024

Senior Front-End Engineer

- Built the frontend for an open-source, privacy-first DeFi portfolio tracker supporting 400+ protocols across 17 blockchains.
- Developed responsive and accessible user interfaces for portfolio tracking, wallet management, and asset analytics.
- Integrated blockchain data from multiple EVM networks to provide a unified portfolio experience.
- Collaborated with designers and backend engineers to deliver a polished, production-ready user experience.

Tech stack: React, Next.js, TypeScript, Chakra UI, Zustand, React Query, Viem/Wagmi.

LlamaNodes - Remote

Jul 2022 – May 2024

Senior Front-End Engineer

- Built the frontend for a Web3 RPC platform providing high-performance, low-latency blockchain infrastructure for developers.
- Developed responsive dashboards for managing RPC endpoints, API keys, usage analytics, and account settings.
- Built reusable UI components and frontend architecture to support a scalable developer platform.
- Collaborated with backend engineers to integrate infrastructure APIs and deliver a reliable production experience.

Tech stack: React, Next.js, TypeScript, Chakra UI, Zustand, React Query, Viem/Wagmi.

Aluna.Social - Remote

Mar 2021 – Jun 2022

Senior Front-End Engineer

- Contributed to a multi-exchange crypto trading platform featuring portfolio management, social trading, and copy trading.
- Built and maintained React and Next.js interfaces for a seamless multi-exchange trading experience.
- Developed responsive trading interfaces for portfolio management, order execution, and real-time market data.
- Collaborated with backend engineers and product designers to deliver reliable, production-ready trading experiences.

Tech stack: React, Next.js, TypeScript, Chakra UI, Zustand, SWR, MongoDB.

ARK Ecosystem - Remote

Jan 2020 – Jan 2021

Full-Stack Engineer

- Contributed to ARK Explorer and ARK Desktop Wallet, two core products of the ARK blockchain ecosystem.
- Developed features for a multi-asset desktop wallet built with Electron, supporting ARK-based networks and multiple cryptocurrencies.
- Built user interfaces for blockchain explorers, allowing users to browse transactions, wallet addresses, blocks, and network activity.
- Collaborated with designers and backend engineers to deliver secure, production-ready blockchain applications.

Tech stack: React, TypeScript, Electron, Tailwind CSS, Testing Library, TestCafe.

Meteorite BI - Remote

Sep 2014 – Jan 2020

Front-End Engineer

- Contributed to Saiku, a web-based business intelligence platform for interactive OLAP analysis and reporting.
- Built and maintained data visualization interfaces, reporting features, and analytical dashboards for enterprise users.

- Developed reusable frontend components and interactive charts for exploring multidimensional datasets in real time.
- Collaborated with backend engineers and product teams to deliver production-ready business intelligence solutions.

Tech stack: Java, Backbone.js, Underscore.js, HTML5, CSS3, jQuery, jQuery UI, D3.js, CCC Chart.

Udacity - Remote

Jun 2016 – Dec 2019

Mentor and Project Reviewer

- Mentored students enrolled in Udacity Nanodegree programs, providing technical guidance and helping them achieve their learning goals.
- Reviewed student projects, delivering actionable feedback on programming fundamentals and frontend development best practices.

NUTES (UEPB) - Brazil

Jul 2014 – Nov 2015

Student Researcher

- Developed software for electrocardiogram (ECG) acquisition and analysis in emergency cardiac care.
- Built a web application for electronic medical record visualization and management.
- Co-authored research published at CBMS 2015 and CBEB 2016 on intelligent decision support systems and portable electrocardiography.

Microsoft - Brazil

Dec 2012 – Oct 2015

Microsoft Student Partner

- Organized technical talks, workshops, and community events to promote software development and Microsoft technologies.
- Delivered presentations and hands-on sessions for students on web development, programming, and Microsoft platforms.
- Helped build and grow the local developer community by mentoring students and encouraging knowledge sharing.

Indra Company - Brazil

Jun 2013 – Sep 2014

Systems Analyst

- Contributed to SIGSAB, an information and knowledge management system developed for the Brazilian National Institute of the Semi-Arid Region (INSA).
- Built and maintained frontend interfaces while integrating geospatial data and business intelligence tools.
- Collaborated with cross-functional teams to deliver production-ready government software solutions.

Tech stack: Java, PHP, PostgreSQL (PostGIS), i3Geo, HTML5, CSS3, jQuery, jQuery UI.

EDUCATION

Facisa - Faculdade de Ciências Sociais e Aplicadas, Campina Grande, Brazil

2009 – 2015

BSc of Information Systems

PUBLICATIONS

- **A Portable System to Support Electrocardiography in Emergency Care.** IEEE Symposium on Computer-Based Medical Systems (CBMS), 2015.
- **A Method for Intelligent Support to Medical Diagnosis in Emergency Cardiac Care.** 25th Brazilian Congress on Biomedical Engineering (CBEB), 2016.

AWARDS

Paraiba Olympiads in Informatics

2012

Bronze Medal

SKILLS

- **Languages:** JavaScript, TypeScript
- **Frontend:** React, Next.js, React Native, Tailwind CSS, shadcn/ui, Radix UI, Base UI, Chakra UI
- **Desktop:** Electron, Tauri
- **State Management:** Redux, SWR, TanStack Query, Zustand
- **Blockchain:** Web3.js, Ethers.js, Wagmi, Viem, LayerZero OFT
- **Backend:** Node.js
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Backend Services:** Firebase, Supabase
- **Testing:** Jest, React Testing Library, Vitest, Cypress, TestCafe
- **Tooling:** Webpack, Docker, GitHub Actions, pnpm, Turbo, Vite

GENERAL

CGHackspace

2014 – 2019

Proud member of CGHackspace, a Hackerspace located in Campina Grande/Brazil. Responsible for organizing talks and events about hacking, technologies, and open source.
